WORK EXPERIENCE

ZED Digital

Web Developer, May 2022 - Present

Web Developer Intern, Oct 2021 - April 2022

As a React Dev,

- Admin Tool Application:
  - Designed and developed an admin tool for seamless configuration changes across mobile apps and backend databases.
  - Ensured efficient communication between front-end and APIs for smooth CRUD operations.
  - Worked with React POS systems for tracking items for sale and generating reports based on sold items.
- UI Components and Pages:
  - Created reusable UI components and various pages using React.
  - Focused on responsive design and user-friendly interfaces.
  - Worked with handling access tokens, adding two-factor authentication with various additional items.
- Deployment and Version Control:
  - Deployed applications using Bitbucket & Netlify maintaining version control and efficient collaboration.
  - Managed a target system where a single repository served multiple applications by enabling/disabling features as needed.
- Real-time Analytics Panels:
  - Developed analytics panels with dynamic charts, integrating real-time data via APIs.
  - Enhanced data visualization for informed decision-making.

Projects using React

- Michigan Department of Transit
- ZIG Panel (Company Objectives)
- Peru Toll Systems
- Analytics Panels based on Target System
- Colorado Department of Transportation
- Ecolane & Jetty Park
- GO Raleigh Access
- Alamo Regional Transit

As a Wordpress Dev,

- Web Development and Maintenance: Developed and managed websites for diverse clients, including SSL setup, hosting, and domain management using platforms like cPanel, ICDSoft, and GoDaddy, HostGator, etc.,
- Worked with theme setups and page builders to create attractive and responsive websites.
- WordPress Expertise: Proficient in WordPress development, plugin management, and worked with woocommerce for e-commerce sites.
- Content Creation and Migration: Wrote news articles, blogs, and performed content migration for live websites.
- ADA Compliance: Added ADA Level 2 features to ensure accessibility.
- Analytics and Marketing: Utilized Google Analytics, created custom emails with Mailchimp, and implemented custom payment solutions.
- Worked with vTiger and Outlook for maintaining leads and sending newsletters.
- Worked with Self Dedicated and VPS Windows servers for SSL installations, pointing DNS for new server setup.
- Created RFPs and written whitepapers and videos for various demo proposals.
- Increased website performance and automated form submissions integration with Google Sheets to store form data.
- Adding Additional security for websites, recovering hacked websites and restored them as soon as possible.
